GOSSIP OF WALL STREET.

When two weeks ago it became known that the managers of the United States Steel Corporation had practically decided upon a voluntary increase in wages most Wall Street speculators were bearish and disposed to put an unfavorable construc-tion upon everything. The stock then sold off. It happened that concurrently with this development Mr. Gompers was engaged in one of those tirades against the company that have become a habit with him, and it was argued that the company was impelled to raise wages in order to check the efforts of the unions to organize the hamilies of employees killed in idents at work. The plan was ratifled thursday at the meeting of presidents. Seemingly all agreed that the advances would be beneficial to the company in assuring the loyalty of the effect May 1. It is a purely voluntary of the operating force. There was, however, the objection that the increase in wages rather diminished the prospects of an increase of the dividend to 5 per cent.

It was estimated that the increase in wages already declared to be effective May 1 and the increase to be made effective June 1 would make an increase of about \$10,000,000 in the expenses of the company per annum. The amount is equal to about 2 per cent. on the common stock outstanding. An increase of the dividend from 4 to 5 per cent, would mean an addition of \$5,000,000 in dividend payments, so that the wage and dividend increases combined would entail additional payments of \$15,000,000. Bears, beaten breathless Monday and very subdued since that time, raised their voices again and insisted that the directors would not thus heavily increase charges at a time

On account of this argument a new short ried men than for single men and interest seemed to be accumulating in according to the number of chil- Steel common resterday. Trading in the stock was less active than on previous days of their wages and married aggressive selling. The market absorbed for each child under 16 and 2 per cent. readily, was firm at the close and at no posure of the many speculators carrying and all legislation suggested in this the stock in anticipation of an increase that speculation in the stock became two sided again and accordingly more interest
